

RETHINK THE WORD “VALUABLES”

Here are a few of the soft targets for which thieves and vandals often look:

Sports equipment

Secure sporting goods inside your home, or keep them in heavy-duty, locked bins inside a locked garage or shed.

Air conditioning units

AC units have copper coils and other metal piping. Install bright, motion-activated security lighting near your outdoor unit.

Bicycles

If you can't take your bike inside, use a heavy chain, threaded through both wheels and the frame, and a thick padlock to secure it to the rack.

Pool pumps

Your pool area needs to be fenced off and locked. Position the pump in an area covered by bright, motion-activated lightning.

Vehicles

Lock them up! Never leave loose items on the seats or dash. Install a loud alarm system with a visible, blinking dash light.

Vacant properties

Keep vacant home doors and windows securely locked. Put interior lights on staggered timers and install motion-activated exterior lights.

Shed & Garages

Stolen tools and lawn equipment are a lucrative trade. Lock your shed and garage doors.
